Office of the Secretary

Findings of Scientific Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Office of Research Integrity (ORI) has made final findings of scientific misconduct in the following case:

Durga K. Paruchuri, Ph.D., University of North Carolina, Chapel Hill: Based on an investigation conducted by the University of North Carolina, Chapel Hill (UNC), and information obtained during its oversight review, the Office of Research Integrity (ORI), concluded that Dr. Durga K. Paruchuri committed scientific misconduct by falsifying research records and falsely reporting to her supervisor and in a grant application submitted to the Public Health Service (PHS) that she had

produced a clone of meningococcal bacteria transferrin binding protein 1, labeled "pUNCH 701," and used it to obtain a second clone, "pUNCH 702." Furthermore, ORI accepted the UNC finding that Dr. Paruchuri falsified research records at the Lineberger Cancer Research Center oligonucleotide synthesis facility in an attempt to support her false claim. The research was supported by PHS grant R37 AI26837 and reported in grant application 1 RO1 AI32115-01A1.

Dr. Paruchuri accepted the ORI findings and agreed to exclude herself voluntarily for a period of two years beginning December 21, 1995, from any contracting or subcontracting with any agency of the United States Government and from eligibility for, or involvement in nonprocurement transactions (e.g., grants and cooperative agreements) of the United States Government. Dr. Paruchuri further agreed that for a period of one year in addition to and immediately following the two year exclusion period, any institution which submits an application for PHS support for a research project on which Dr. Paruchuri's participation is proposed, or which uses Dr. Paruchuri in any capacity on PHS supported research, or which submits a report of PHS funded research in which Dr. Paruchuri is involved, must concurrently submit a plan of supervision and certification of data accuracy. Dr. Paruchuri also agreed to exclude herself voluntarily from serving in any advisory capacity to the PHS for a period of three years beginning December 21, 1995.

FOR FURTHER INFORMATION, CONTACT: Director, Division of Research Investigations, Office of Research Integrity, 301-443-5330.

Lyle W. Bivens,

Director, Office of Research Integrity.

BILLING CODE 4160-17-P

Agency for Toxic Substances and Disease Registry

Public Meeting of the Inter-Tribal Council on Hanford Health Projects (ICHHP), in Association With the Meeting of the Citizens Advisory Committee on Public Health Service Activities and Research at Department of Energy (DOE) Sites: Hanford Health Effects Subcommittee

The Agency for Toxic Substances and Disease Registry (ATSDR) and the Centers for Disease Control and Prevention (CDC) announce the following meeting.

Name: Public Meeting of the Inter-tribal Council on Hanford Health Projects (ICHHP), in association with the meeting of the Citizens Advisory Committee on Public Health Service Activities and Research at DOE Sites: Hanford Health Effects Subcommittee (HHES).

Time and Date: 9 a.m.—4:30 p.m., February 7, 1996.

Location: Marines' Memorial Club, 609 Sutter Street, San Francisco, California 94102, telephone 415/673-6672, FAX 415/441-3649.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Background: A Memorandum of Understanding (MOU) was signed in October 1990 and renewed in November 1992 between ATSDR and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections 104, 105, 107, and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"). These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

In addition, under an MOU signed in December 1990 with DOE, the Department of Health and Human Services (HHS) has been given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other persons potentially exposed to radiation or to potential hazards from non-nuclear energy production and use. HHS delegated program responsibility to CDC.

Community involvement is a critical part of ATSDR's and CDC's energy-related research and activities and input from members of the ICHHP is part of these efforts. The ICHHP will work with the HHES to provide input on Native American health effects at the Hanford, Washington, site.

Purpose: The purpose of this meeting is to address issues that are unique to tribal involvement with the HHES including considerations regarding a proposed medical monitoring program and explorations of options and alternatives to providing support for tribal involvement in the HHES.

Matters To Be Discussed: Agenda items will include a dialogue around issues that are unique to tribal involvement with the HHES. This will include exploring options and alternatives to providing support for tribal involvement in HHES and a discussion of tribal representation on HHES.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Linda A. Carnes, Health Council Advisor, ATSDR, E-28, 1600 Clifton Road NE., Atlanta, Georgia 30333, telephone 404/639-0730, FAX 404/639-0759.
